

Leek

Stamford TZ 0233

General Description:

Stamford is a new hybrid for the second early maturity slot. In extensive trials has demonstrated a consistent ability to bulk quickly and evenly across the crop. It has good dark blue-green foliage which contrasts well with the lengthy white shafts. Trials have shown this variety to be a consistent performer with good uniformity and excellent bulbing resistance. This variety has also demonstrated a good field resistance to rust. Strong root structure and vigorous early growth make this variety a good choice for low input and organic regimes.

Profile:

Earliness	Aug/September
Leaf Colour	Green
Plant type	4
Shaft Length	5

Key:

Earliness:	1 = slow growing	10 = fast growing
Leaf colour:	1 = light green	10 = dark green
Plant type:	1 = less erect	10 = erect
Shaft length :	1 = short	10 = long

The information that has been provided is an average of the data gathered from various trial locations. Please be aware that variations in the growing environment and climatic conditions can render this information inaccurate, it is intended for general guidance only.
