

# Salad Onion

## Guardsman

### General Description:

A very distinct and innovative variety from the Tozer Seeds breeding programme. Guardsman combines the non-bulbing qualities of *A.fistulosum* varieties and the reduced pungency qualities of *A.cepa* types. A vigorous root system helps to maintain the strong, upright, dark blue-green leaves which make this variety not only suitable for the summer cropping period but also ideal for autumn crops when disease can be a particular problem.

#### Profile:

<b>Erectness</b>	5
<b>Peelability</b>	2
<b>Ease of lifting</b>	2
<b>Bulbing</b>	4
<b>Height (cm)</b>	65-70
<b>Shank length (cm)</b>	15

#### Comments:

Has a vigorous root system which helps to maintain upright leaves.

#### Key:

Erectness:	1 = less erect	5 = very erect	Peelability:	1 = less easy	5 = very easy
Ease of lifting:	1 = less easy	5 = very easy	Bulbing:	1 = bulby	5 = not bulby

The information that has been provided is an average of the data gathered from various trial locations. Please be aware that variations in the rowing environment and climatic conditions can render this information inaccurate, it is intended for general guidance only.
